Emergent IRSA Advisory Committee Meeting held on July 08, 2021

An emergent meeting of the IRSA Advisory Committee (IAC) was held on July 08 2021 to discuss the prevailing Water Situation and WAPDA’s constraints at Tarbela Dam. It was decided with consensus that:

- In future, WAPDA would ensure that IRSA’s indent shall be met in full even below the level of 1437 ft SPD and all arrangements would be made accordingly.
- WAPDA shall submit a realistic plan for the completion of the remaining works of T3/T4 HPP in the next IAC meeting.
- Work on the forthcoming T5 HPP shall begin after due clearance from IRSA to the extent of hydrology & water release issues ensuring that a similar outflow restriction as happened in T3&T4 Project, would not be repeated for T5 HPP.
- System operation for the remaining period of Kharif 2021, based on the matching year of 2018 and as recommended by IRSA shall be adopted.

- Regarding the reservation of PID Sindh on Minutes of meeting dated 16.06.2021 it was decided that PID Sindh would be intimated that their view point is already reflected in minutes of meeting issued by IRSA and the information requested may be shared as early as possible to facilitate IRSA to proceed further in connection with Joint Discharge Measurements / Verification.
- Regarding the selection of IWMI as neutral expert for Joint Discharge Measurement / Verification it was decided that the MoWR would be apprised about awarding the contract for discharge measurement to IWMI and a way forward would be sought in the light of PPRA Rules.

Operational News:-

During the period under report, 05 Nos., 06 Nos. and 17 Nos. consolidated operational directives were issued to Tarbela, Mangla and Chashma, respectively, by the Authority as per its mandate in IRSA of 1992.

Water Account

The actual provincial canal utilization vis-à-vis their shares from April 01 to July 31, 2021 remained 11% less than anticipated likely shares.
